- General advice : Immediate medical attention is required. Show this safety data sheet (SDS) to the doctor in attendance.
- Eye contact : Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician if feel uncomfortable.
- Skin contact : Take off contaminated clothing and shoes immediately.  
Wash off with plenty of water for at least 15 minutes and consult a physician if feel uncomfortable.
- Ingestion : DO NOT induce vomiting.  
Never give anything by mouth to an unconscious person.  
Call a physician or Poison Control Center immediately.
- Inhalation : Move victim into fresh air. If breathing is difficult, give oxygen.  
Do not use mouth to mouth resuscitation if victim ingested or inhaled the substance.  
If not breathing, give artificial respiration and consult a physician immediately.

#### 4.2 Most important symptoms and effects, both acute and delayed

Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure.  
May cause an allergic skin reaction, serious eye irritation, damages to organs through prolonged or repeated exposure.  
Ingestion is likely to be harmful or have adverse effects.

#### 4.3 Protection of first-aiders

First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists.

Ensure that medical personnel are aware of the substance involved.

Take precautions to protect themselves and prevent spread of contamination.

#### 4.4 Notes to physician

Treat symptomatically and supportively.

Symptoms may be delayed.

### 5. FIREFIGHTING MEASURES

#### 5.1 Extinguishing media

- Suitable extinguishing media : Use extinguishing agent suitable for type of surrounding fire.
- Unsuitable extinguishing media : There is no restriction on the type of which extinguishing to be used.

#### 5.2 Specific hazards arising from the substance or mixture

Development of hazardous combustion gases or vapor possible in the event of fire.  
May expansion or decompose explosively when heated or involved in fire.

#### 5.3 Advice for firefighters

As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear.  
Fight fire from a safe distance, with adequate cover.  
Prevent fire extinguishing water from contaminating surface water or the ground water system.

### 6. ACCIDENTAL RELEASE MEASURES

#### 6.1 Personal precautions, protective equipment and emergency procedures

Use personal protective equipment. Keep unprotected persons away.  
Follow safe handling advice and personal protective equipment recommendations.  
Avoid contact with skin, eyes and inhalation of vapors.

Discharge into the environment must be avoided.  
Prevent further leakage or spillage if safe to do so.  
Retain and dispose of contaminated wash water.  
Local authorities should be advised if significant spillages cannot be contained.

### 6.3 Methods and materials for containment and cleaning up

Soak up with inert absorbent material.  
For large spills, provide dyking or other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container.  
Clean up remaining materials from spill with suitable absorbent.  
Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are appl
